

Create a New Class

ALEKS is a subscription-based product. Because you are buying subscriptions for each individual student, you can have as many classes as are necessary to meet the needs of your ALEKS students. You can use the Create a New Class feature to create additional classes at any time.

To create a new class, click on the “Home” box, located at the top of the left column.

Next, click on the “Create a new class” link.

Enter a name for the class, choose the topic and grade level assigned to the class, and then select the subscription type. Once the information has been entered, click on the “Save” button.

Please enter a name for this class:

→ Name:

Then, complete the following information.

→ Topic:

→ Grade:

→ Subscription type:

A confirmation of the class created will be given. Please write down the class code; the students will need it to register for this class.

The following **class has been created:**

Fall 2010 - Period 1 / Algebra 1
Grade: **9th Grade**
Teacher: **Mrs. Summers**
Class code: **12345-67890**

In summary, ALEKS does not restrict how many classes you can have; you can use the Create a New Class feature to create as many classes as you need.
