

## Creating Master Templates

An ALEKS Master Template is a set of defined class settings that can be created once and applied to multiple classes linked to the Master Template. This creates uniformity and consistency across sections.

Administrators can create a Master Template, add assignments, and update any number of linked classes based on the Master Template. Once linked classes are created based on the Master Template and assigned to instructors, the Master Template settings will apply to all linked classes. Instructors teaching the linked classes can edit anything in their individual settings and assignments, including adding their own assignments. However, administrators can prevent instructors from editing the course content or assignments should they choose to do so.

The Master Template is available to ALEKS administrators, and can only be accessed through the Advanced Instructor Module by clicking on the purpose **Master Templates** folder.

After clicking on the **Create Master Template** link in the **Home** tab, administrators will arrive at an introductory page. Administrators can either click on the **Continue** button to create a new Master Template, or click on the provided link to create a Master Template based on an existing ALEKS class (see image on next page).

## Introducing the Master Template

### How it works

Creating a Master Template is a 3-part process. Each part will involve multiple steps. You will be able to save and edit your information in the process.

**Part 1. Define Template Basics** - Define the course settings and subject matter content and select a textbook for the Master Template.

**Part 2. Create Assignments** - Set up assignments that will be applied to each course linked to the Master Template.

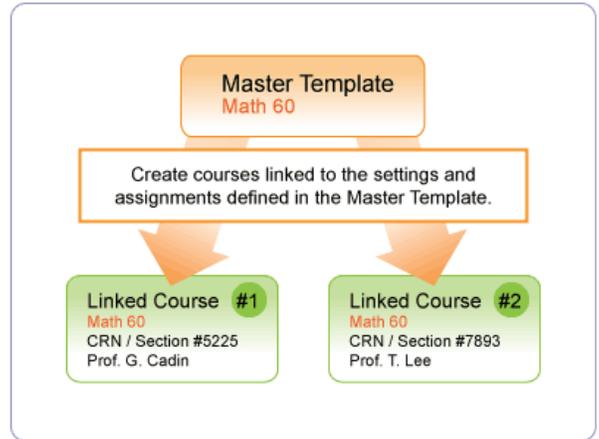

**Part 3. Create Linked Courses** - Create and link courses to the Master Template and assign them to instructors.

Once linked courses have been assigned, instructors will be able to customize their own individual courses to suit their needs by:

- Adding and editing additional assignments.
- Editing assignment start dates and due dates.
- Making other setting changes.

Alternatively, you have the option to [create a Master Template based on an existing course](#).

To create a Master Template from the beginning, click on "Continue".

Continue

## Option A: Create a New Master Template from Scratch

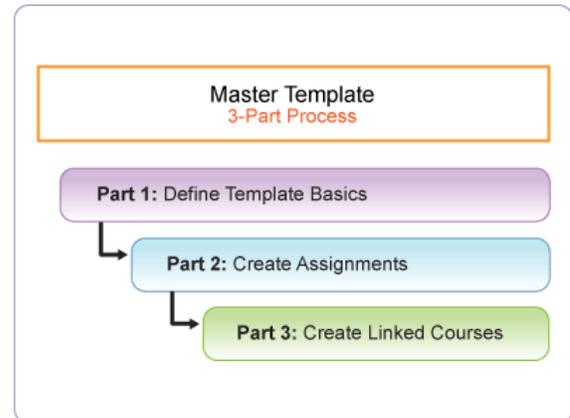

After clicking on the **Continue** button, administrators will see an introductory page that outlines the three steps they will take to create a new master template.

### Part 1. Define Template Basics - Introduction

In Part 1, you will select a textbook and define the course content and settings.

Before you begin, please have the following information ready:

1. The name of the Master Template (e.g., Math 100)
2. The name of the ALEKS course product that the Master Template will be using
3. The start and end dates of the Master Template
4. The name of the Textbook used with the Master Template (if any)
5. The course syllabus

Previous Step

Start Template Basics

## Part 1: Define Template Basics

In Part 1 of the Master Template set-up wizard, administrators will walk through the standard ALEKS class creation steps beginning with the Basic Information.

### Part 1. Define Template Basics - Basic Information

Master Template Name:  (example: Math 60) [?](#)

ALEKS Course:  (Required)

**Significant Digits Option**

In problems requiring numerical answers, ALEKS can require students to know and apply significant digits rules, or simply tell the student how many significant digits his answer should contain. [?](#)

Choose one:

Require the student to know and apply significant digits rules.

Just tell the student how many significant digits his answer should contain.

**Significant Digits Warnings**

In Assessment Mode ALEKS gives a pop-up warning to students when their answers are correct but have the wrong number of significant digits. This warning is given before ALEKS grades the student's answer, so that if the student heeds the warning no penalty applies. You have the option to turn on this warning during Learning Mode as well. [?](#)

Choose one:

Turn on significant digit pop-up warning in Learning Mode.

Do not display significant digit pop-up warning in Learning Mode.

Course Dates: Start:       [?](#)

[Next Step](#)

The next step is selecting whether or not to integrate a textbook with the Master Template.

### Part 1. Define Template Basics - Select Textbook

You have the option to integrate a textbook(\*) with your course.

(1) With Textbook Integration, ALEKS will automatically place chapter and section references on the ALEKS explanation pages. This way, your students can easily look up parallel material in their textbook to expand on what they are doing in ALEKS.

(2) Textbook Integration can also divide up the material in the ALEKS course according to your textbook chapters, making it possible to assign completion dates as in a normal syllabus.

Do you plan to use a textbook with ALEKS?

Yes

No

Select your textbook:

[my textbook isn't here...](#)

NOTE: Most instructors prefer to have both the references (1) and the syllabus control (2). However, if you wish to have only the references, please click the box below.

Only reference the textbook; do not direct student learning.

(\*)References to any part of any textbook are for identification purposes only. No implication is intended that ALEKS Corporation is endorsing any textbook, or that any textbook author or publisher is endorsing ALEKS. ALEKS Corporation is solely responsible for the development, selection, and sequencing of all ALEKS content.

[Previous Step](#) [Next Step](#)

If the administrator chose to integrate a textbook, the next step is to select the content for each Objective. Otherwise, the administrator would see the Content Editor, from which they can remove or add topics.

**Textbook(\*) in use:** Silberberg: Chemistry: The Molecular Nature of Matter and Change, 6th Ed. (McGraw-Hill)

Textbook Alignment	ALEKS Objectives	Due Date
<a href="#">[ open all   close all ]</a> Ch.0-Math and Physics <b>Ch.1-Keys to the Study of Chemistry</b> Ch.2-The Components of Matter Ch.3-Stoichiometry of Formulas and Equations Ch.4-Three Major Classes of Chemical Reactions Ch.5-Gases and the Kinetic-Molecular Theory Ch.6-Thermochemistry: Energy Flow and Chemical Change Ch.7-Quantum Theory and Atomic Structure Ch.8-Electron Configuration and Chemical Periodicity Ch.9-Models of Chemical Bonding Ch.10-The Shapes of Molecules Ch.11-Theories of Covalent Bonding Ch.12-Intermolecular Forces: Liquids, Solids, and Phase Changes Ch.13-The Properties of Mixtures: Solutions and Colloids Ch.14-Periodic Patterns in the Main-Group Elements Ch.15-Organic Compounds and the Atomic Properties of Carbon	Objective #1 (44 topics) <a href="#">A</a> <a href="#">Edit</a> Ch.0-Math and Physics Objective #2 (22 topics) <a href="#">A</a> <a href="#">Edit</a> Ch.1-Keys to the Study of Chemistry Objective #3 (0 topics) <a href="#">Edit</a>           	08/26/2013 6:00 am 09/03/2013 6:00 am           

[New Objective Folder](#)

Last, administrators can review their course settings. They can edit information here, or click the **Save** button to continue with the Master Template set-up process.

When administrators have completed Part 1 of the Master Template creation process, they will see a confirmation page. **Advanced Options** is where administrators can customize additional settings for the class, gradebook, worksheets, and assessments. **Lockout Options** allow administrators to lock the content and/or any assignments so instructors cannot make adjustments to these two settings.

**You have completed Part 1 of 3. Proceed to Part 2: "Create Assignments".**

**Part 1. Define Template Basics - Confirmation**

---

**Your Master Template has been successfully set up:**

**Template Basics Details:**

- **Master Template Name:** Gen Chem I
- **ALEKS Course:** General Chemistry (First Semester)
- **Subscription Type:** Higher-Ed any access code
- **Start Date:** 08/26/2013
- **End Date:** 12/13/2013
- **Textbook:** Silberberg: Principles of General Chemistry, 3rd Ed. (McGraw-Hill Companies, Inc.)
- **ALEKS Objectives:** 15 ALEKS objectives created

[Download ALEKS Course Syllabus](#) ▼

**Advanced Options** [\[ show more \]](#)

---

Customize these options as needed. Please note that these settings will be copied to all linked courses within the Master Template. Select the "show more" link to edit additional options for your Content, Course, Gradebook, Worksheets, or Assessment.

**Lockout Options** [\[ show more \]](#)

---

Use these options to prevent instructors from editing the course content or assignments in courses linked to this Master Template.

---

**Part 2: Create Assignments**
   Or [I will create assignments later](#)

## Part 2: Define Template Basics

Once administrators complete Part 1, they can proceed to **Part 2: Create Assignments** if they plan to include ALEKS assignments (Homework, Quiz, or Test). To skip Part 2, administrators click on the **I will create assignments later** link, which will allow them to proceed to **Part 3: Create Linked Courses**.

## Part 3: Create Linked Courses

When administrators get to Part 3, they will first see an introductory page. From this page, they can continue by clicking on the **Create Linked Courses** button or simply view the Master Template Summary instead.

### Part 3. Create Linked Courses - Introduction

Now that you have defined the Master Template settings and content and created assignments, you can create linked courses linked to the Master Template and assign instructors to these courses. Additional linked courses can be created within the template at any time.

Immediately after being created, each linked course is a copy of the template.

Each instructor has the ability to customize the individual course to which the instructor has been assigned at any time, including changing start and due dates, editing assignments, and creating additional assignments.

Please note, however, that any update to the Master Template will override customizations made by the instructor of the linked courses.

Click on **"Create Linked Courses"** to start.

[Create Linked Courses](#) Or [View Master Template Summary](#)

Administrators can easily create as many linked courses as they need from one page. First they assign a name to each course, and then they select an instructor to assign the course to. Administrators also have the option to assign the course later or create an instructor account directly from this page.

### Part 3. Create Linked Courses - Assign Instructor to Linked Courses

Enter the CRN (Course Reference Number) or Section number. Select the instructor teaching the linked course. If you need additional courses, use the "Create another Linked Course" button.

**Linked Course #1** [\[delete\]](#)

**Master Template Name:** Gen Chem I

**Course CRN / Section:**  (Example: "55555 Algebra MW 10:30-11:30AM") [\[Learn more\]](#)

**Instructor:**  Existing ALEKS Instructor:  (Choose one) [\[Learn more\]](#)

Instructor to be announced (TBA) [\[Learn more\]](#)

Create a new Instructor [\[Learn more\]](#)

**Linked Course #2** [\[delete\]](#)

**Master Template Name:** Gen Chem I

**Course CRN / Section:**  (Example: "55555 Algebra MW 10:30-11:30AM") [\[Learn more\]](#)

**Instructor:**  Existing ALEKS Instructor:  (Choose one) [\[Learn more\]](#)

Instructor to be announced (TBA) [\[Learn more\]](#)

Create a new Instructor [\[Learn more\]](#)

[Create another Linked Course](#)

[Save](#) or [View Master Template Summary](#)

## Option B: Create a Master Template Based on an Existing Course

To create a Master Template from an existing course, administrators first click on the **Create a Master Template** link from the **Home** tab, and then click on the **create a Master Template based on an existing course** link from the introductory page. They will then see a drop-down menu from which they can select the existing course they want to create a Master Template from.

### Create Master Template from Existing Course

---

You can create a Master Template based on an existing course. The course settings and its assignments will be copied. Please select from the list of existing courses below:

Existing Courses:

Click "**Create Master Template**" to create a template based on the selected course, or click "**Cancel**".

---

[Create Master Template](#) [Cancel](#)

After clicking on the **Create Master Template** button, a confirmation message will appear to inform administrators that their Master Template has been created. All course settings and assignments from the existing course are copied into the Master Template.

 **Your changes have been saved successfully.**

---

### Create Master Template from Existing Course

---

The Master Template **Template of Audrey Test - MWF 8am** has been created.

You can add more assignments to this template by going to the Master Template Summary page.

---

[Go to Master Template Summary](#)

Administrators can then view and edit the template settings by clicking on the **Go to Master Template Summary** button. This page may be used as a guide to show which parts have been completed or require completion. Administrators can view or edit each part by selecting the appropriate link next to each part.

After a Master Template has been created, administrators can view it in the purple Master Templates folder. The Master Templates folder is structured by ALEKS Course / Master Template name.
