

# Implementation Strategies

**Oleg Kudryashov**

**Metairie, LA**

**Scenario:** Homeschool Core Curriculum

**Purpose:** Improve Skills

**Time Spent in ALEKS:** 30 minutes per day, 4–5 days per week

**ALEKS Course:** Essential Mathematics (with QuickTables)

**Overall Experience:**

My son loves ALEKS. We've only used it for a brief time, but he is completing math without complaining, and he truly understands it!

**What challenges did the student face in math prior to using ALEKS?**

Prior to using ALEKS, math was just too hard to understand, and my son couldn't retain the information.

**What were you looking for in an online math tool?**

We were looking for something different than the traditional textbook approach because it wasn't working for us.

**What math progress has the student experienced since using ALEKS?**

I'm happy with my son's desire to complete his math.

**How does the student feel about his/her progress in ALEKS?**

He feels good and confident in his math studies, and doesn't feel as though it is too hard for him any longer.
