

# Implementation Strategies

**Collette Oddleifson**

**St. Albert, Canada**

**Scenario:** Homeschool Core Curriculum

**Purpose:** Personalized Learning

**Time Spent in ALEKS:** 20 minutes per day, 5 days per week

**ALEKS Course:** Mathematics – MS/LV 6

**Overall Experience:**

ALEKS is EXCELLENT!

**What challenges did the student face in math prior to using ALEKS?**

The usual curriculum did not move quickly enough.

**What were you looking for in an online math tool?**

We needed something self-paced with an ongoing assessment feature that provided adequate feedback.

**What math progress has the student experienced since using ALEKS?**

My son is learning much faster and comprehending more.

**How does the student feel about his/her progress in ALEKS?**

My son is motivated by his assessment results and filling in his pie chart. He is less annoyed and frustrated since using ALEKS. The independence and ability to see his progress for himself has been beneficial.
