**ALEKS® RELEASES NEW COURSES TO PREPARE STUDENTS FOR
FLORIDA END-OF-COURSE MATH EXAMS**

Targeted Course Products Available to Ensure Success on New State Exams

IRVINE, CA – ALEKS Corporation, a leading provider of web-based assessment and learning solutions for mathematics, science, and business courses, has released two new adaptive, online courses: Prep for FL Algebra 1 EOC Assessment and Prep for FL Geometry EOC Assessment. With targeted math content and personalized instruction, these courses ensure that students master the topics covered on the Florida End-of-Course (EOC) math exams required for graduation.

Created using the Florida EOC benchmarks, each course provides thorough coverage of the math content assessed by its respective EOC exam, Algebra 1 or Geometry. In addition, the courses are correlated to the Next Generation Sunshine State Standards (NGSSS), which are also measured by the EOC exams. Through integrated reporting in ALEKS, teachers can access real-time data on class and student progress toward mastery of the NGSSS. These automated reports provide detailed insight into which standards students have not yet mastered, enabling teachers to better direct and differentiate instruction to target knowledge gaps.

“By the time students reach high school, their mathematics strengths and weaknesses are all over the map. We created these targeted courses so students can effectively prepare for the EOC exams with instruction tailored to their unique needs,” said Wil Lampros, President of ALEKS Corporation. “By basing course content on the Florida EOC benchmarks and state standards, these courses ensure students meet the expectations for achievement in Florida as measured by the exams. ALEKS helps students establish the foundational knowledge needed for math success in order to graduate and become college and career ready.”

Using artificial intelligence and adaptive questioning, ALEKS identifies precisely what a student knows and doesn't know within a course. Through truly individualized instruction on the exact topics the student is most ready to learn, ALEKS strengthens areas of weakness and enables immediate success in mastering course material.

To view the content covered in the Prep for FL Algebra 1 EOC Assessment and Prep for FL Geometry EOC Assessment courses, please visit www.aleks.com/k12/course_products. Educators can also explore these courses by signing up for a complimentary trial at www.aleks.com/free_trial/instructor.

About ALEKS Corporation

ALEKS Corporation is a leader in the creation of web-based, artificially intelligent educational software. ALEKS assessment and learning technologies were originally developed by a team of cognitive scientists, mathematicians, and software engineers at the University of California,

Irvine, with major funding from the National Science Foundation. ALEKS is founded on groundbreaking research in mathematical cognitive science known as Knowledge Space Theory. Through adaptive questioning, ALEKS accurately assesses a student's knowledge state, and then delivers targeted instruction on the topics a student is most ready to learn.

ALEKS has been used by millions of students in over 50 different mathematics, science, and business courses at thousands of K-12 schools, colleges, and universities throughout the world. For additional information, visit: www.aleks.com.
