**ALEKS K-12 COURSE PRODUCTS NOW CORRELATED
WITH ALL 50 STATES' STANDARDS**

Dynamic Reporting Tracks Student Progress Toward State Standards

TUSTIN, CA – ALEKS Corporation, a leading provider of K-12, Higher Education, and Consumer Web-based assessment and learning solutions for mathematics, today announced that its K-12 course products for grades 3-12 are now correlated with all 50 states' standards. The ALEKS state standards integration offers detailed correlations and reporting features that provide teachers and administrators with a precise view of student progress toward fulfillment of state standards. Reports can be viewed at the student, class, school, and district level to provide an accurate picture of student mathematics knowledge versus the state standards.

ALEKS is a Research-Based Online Math Program:

- Artificial Intelligence Targets Gaps in Individual Student Knowledge
- Assessment and Learning with Standards-Based Content
- Customizable Curriculum Aligns with Course Syllabi or Textbooks
- Monitor Student, Class, School and District Progress Toward State Standards
- Fully Bilingual - English and Spanish
- Unlimited Online Access - PC and Mac Compatible

ALEKS developed the new state standards integration in order to address the growing demand for accountability and measurable success in K-12 education. "It's critical to ALEKS that we continually build upon the learning solutions that propel student success," said JP Lenney, Senior Vice President of ALEKS Corporation. "The new state standards correlations for ALEKS K-12 course products allow teachers to better meet the unique learning needs of each student. With the variety of reports offered by ALEKS, teachers and administrators always have an accurate picture of student progress toward state standards and can use ALEKS to target any gaps," he added.

Fundamentally different from other educational software, ALEKS (Assessment and LEarning in Knowledge Spaces) uses an artificial intelligence engine that assesses each student individually and continuously. Through adaptive questioning, ALEKS accurately assesses a student's knowledge and then delivers targeted instruction on the exact topics a student is most ready to learn. As the student learns new topics, ALEKS constantly updates its map of the student's knowledge.

ALEKS K-12 course products correlated with state standards are available for immediate use as a core curriculum or supplement, and can be used with remediation, intervention, gifted, after-school, and summer school programs. To view the state standards correlations please visit http://www.aleks.com/k12/state_standards and to see online reporting of state standards

integration, begin a complimentary ALEKS trial of the Teacher Module at http://www.aleks.com/free_trial/instructor.

About ALEKS Corporation

ALEKS Corporation is a leader in the creation of Web-based artificially intelligent educational software. ALEKS assessment and learning technologies were originally developed by a team of cognitive scientists, mathematicians, and software engineers at the University of California, Irvine, with major funding from the National Science Foundation. ALEKS is founded on groundbreaking research in mathematical cognitive science known as Knowledge Space Theory. Through adaptive questioning, ALEKS accurately assesses a student's knowledge state, and then delivers targeted instruction on the topics a student is most ready to learn.

ALEKS has been used by millions of students in more than 50 academic subjects ranging from elementary school mathematics to Precalculus at thousands of schools and other educational institutions throughout the world. For additional information, visit <http://www.aleks.com>.
