New Mathematics Solution Available for English Language Learners

ALEKS Corporation Expands Bilingual Course Product Offerings

TUSTIN, CA – ALEKS Corporation, a leading provider in K-12, Higher Education, and consumer Web-based assessment and learning solutions for mathematics, today announced the completion of an additional bilingual course product. Algebra 2 joins the growing ALEKS library of K-12 course products that are available in English and Spanish. ALEKS bilingual courses allow students to toggle between English and Spanish math content with the click of a mouse.

ALEKS course products feature:

- **Fully Bilingual Student Interface and Content in English/Spanish for Grades 3-9 & Algebra 2**
- Artificial Intelligence Targets Gaps in Individual Student Knowledge
- Assessment and Learning with Standards-Based Content for Grades 3-12
- Comprehensive & Customizable Curriculum that Aligns with Course Syllabi or Textbooks
- Student, Class, School and District Reports Monitor Progress Toward State Standards
- Unlimited Online Access – PC & Mac Compatible

With the addition of Algebra 2, ALEKS offers a robust bilingual course library. "It is critical to ALEKS that we continually build upon the learning solutions that propel student success," said JP Lenney, Senior Vice President of ALEKS Corporation. "By providing access to bilingual mathematics content, we are addressing the needs of a growing population of students classified as English Language Learners - a group of students previously underserved in the current mathematics education marketplace," he added.

Fundamentally different from other educational software, ALEKS (Assessment and LEarning in Knowledge Spaces) uses an artificial intelligence engine that assesses each student individually and continuously. Through adaptive questioning, ALEKS accurately assesses a student's knowledge and then delivers targeted instruction on the exact topics a student is most ready to learn. As the student learns new topics, ALEKS constantly updates its map of the student's knowledge.

ALEKS Algebra 2 with bilingual mathematics content is available for immediate use as a core curriculum or supplement for use in remediation, intervention, gifted, or after-school programs.

About ALEKS Corporation

ALEKS Corporation is a leader in the creation of Web-based artificially intelligent educational software. ALEKS assessment and learning technologies were originally developed by a team of cognitive scientists and software engineers at the University of California, Irvine, with major

funding from the National Science Foundation. ALEKS is founded on groundbreaking research into cognitive psychology and applied mathematics. Through adaptive questioning, ALEKS accurately assesses a student's knowledge state, and then delivers targeted instruction on the topics a student is most ready to learn.

ALEKS is currently being used by hundreds of thousands of students in more than 20 academic subjects ranging from elementary school mathematics to precalculus at thousands of schools and other educational institutions throughout the world. For additional information, visit
